Apertus SovereignGate: Zero-Retention FADP Proxy

Author: FOKRUL ISLAM (IntelliYash Lab)

1. Abstract & FADP Formulation

Swiss revDSG / FINMA 2018/3 compliance for foundational LLM Apertus 70B.

2. Reverse Airlock Architecture

In-flight surrogate regex tokenization and byte-level RAM shredding.

3. Zero-Retention Memory Shredding

ctypes.memset zeroization achieving 0-byte memory residue and 0.13 ms overhead.

4. Audit Attestation & Conclusion

Cryptographic SHA-256 attestation. Repo: github.com/fokrulanthro16-eng/Apertus-SovereignGate
